# ALSHIFA MEDICAL SYRINGE

MANUFACTURING COMPANY |

1

ALSHIFA medical syringe is one of the leading manufacturing of medical syringes in Saudi Arabia , from more than 35 years to improve the quality of healthcare services providing to patient every where .

ALSHIFA medical syringe manufacturing company is dedicated to building a healthier tomorrow and helping people live in a healthier world .

In ALSHIFA , we strive to maintain the highest standards in design , manufacture , quality control and customer satisfaction .

### **Core Focus :**

- Consistency making and exceeding our customer's expectations for our product quality.
- Superior in timely delivery of products and other services to meet our customer requirements.
- Continuous improvement in our process and new technological systems.

ALSHIFA medical syringe manufacturing company :

Is the largest syringe producer in saudi arabia and the middle east, since 1980. This background set the stage for our work in developing high quality injection products for the healthcare market.

2

# Mission & value

**We are committed to excellence in providing compassionate personalized health care through:**

- Develop core competencies in manufacturing
- Design & develop innovative and new products
- Ensure consistency in quality
- Learn manufacturing for competitive customer prices

## Our mission

### **Building a healthier tomorrow**

It is a promise we made to our customers and the society . We will protect the safety of healthcare, workers , patients and environment by providing innovative , high quality medical devices.

## Our core values :

### **Clean Care Is Safe Clear**

We believe that all medical treatments are meant for improving quality of life .  
Therefore two factors are considered most important by us.

### **Quality & Safety :**

We are committed to the highest standards of every product we make to eliminate unnecessary suffering and death resulting from unsafe medical practices.

We drive great satisfaction to make this world a safer place achieving its standards through sterilization, clean room assembly and packaging process.

### **Keep Innovating**

Quality & Safety are the ground rules for everything. Beyond that, innovation is one of those key elements that keep driving us forward. We always strive to improve or develop the products which best suit your need.

### **Quality Policy**

We will consistently provide superior products for the health sector to help all people live healthy lives. This will be achieved through customer centric, continuous improvement and maintaining an effective quality system which complies with regulatory requirements.

### **Expertise & Resources**

ALSHIFA medical syringe manufacturing company employees are dedicated to the mission and its vision. Our administrative and technical staff has not only brought valuable contribution, but also culture diversity to the company. We are creating the most cheerful and friendly working environment for our employees.

# ALSHIFA MEDICAL SYRINGE

has achieved the following certificates ▶▶

Quality Mark issued by Saudi Arabian Standards Organization (SASO)

ISO 13485 : 2003 for medical devices notified body – SGS, UKAS

ISO system certification

WHO (PQS) – Prequalification system for immunization fixed dose syringes

Medical Device registration with U.S. FDA - 9680597

510(k) Premarket notification : K972452 - RAMY piston syringes

510(k) Premarket notification : K971664 - RAMY integrated insulin syringes

GMP – Good manufacturing practice certified by SASO.

PERFORMANCE QUALITY SAFETY

# RAMY<sup>®</sup>

Hypodermic disposable Luer Lock syringe with or without needles

For situations in which luer lock needle systems are required or preferred, ALSHIFA medical introduces the RAMY<sup>®</sup> syringe and it provides the added ability to exchange needles .

## feature

- Quality needle - for greater injection comfort.
- Highly transparent barrel with bold, precise scale- for perfect visualization and accurate dosage.
- Semi transparent needle hub- for quick observation of flashback.
- Integrated plunger stopper - prevents plunger from being pulled out, avoiding exposure to hazardous fluids.
- High quality individually blister packaging ensures sterility.
- Special silicon lubrication for smooth plunger movement.
- Wide Flanges for comfort and stability.

## Product Range

- 3ml RAMY<sup>®</sup> Luer Lock with exchangeable needle.
- 5ml RAMY<sup>®</sup> Luer Lock with exchangeable needle.
- 10ml RAMY<sup>®</sup> Luer Lock syringe with exchangeable needle.
- 20ml RAMY<sup>®</sup> Luer Lock syringe with exchangeable needle.
- 50ml RAMY<sup>®</sup> Luer Lock syringe with exchangeable needle.

# RAMY<sup>®</sup>

Hypodermic disposable Slip Tip syringes with or without needle

For situations in which customer require or preferred slip tip syringe nozzle. ALSHIFA medical introduces the RAMY<sup>®</sup> Slip Tip Syringe and it provides the added ability to exchange needles .

## feature

- Highly transparent barrel with bold, precise scale for perfect visualization and accurate dosage.
- Semitransparent needle hub for quick observation of flashback.
- Integrated plunger stopper prevents plunger from being pulled out, avoiding exposure to hazardous fluids.
- High quality individually blister packaging ensures sterility.
- Special silicon lubrication for smooth plunger movement.
- Wide flanges for comfort and stability.

## Product Range

- 1ml RAMY<sup>®</sup> Slip Tip centric with exchangeable needle.
- 3ml RAMY<sup>®</sup> Slip Tip centric with exchangeable needle.
- 5ml RAMY<sup>®</sup> Slip Tip centric with exchangeable needle
- 10ml RAMY<sup>®</sup> Slip Tip centric or eccentric syringe with exchangeable needle.
  
- 20ml RAMY<sup>®</sup> Slip Tip eccentric nozzle syringe without needle.
- 50ml RAMY<sup>®</sup> Slip Tip eccentric nozzle Syringe without needle.
- 50ml RAMY<sup>®</sup> Slip Tip centric tip syringe without needle.

# RAMY<sup>®</sup> 1ml Vaccination or Tuberculin hypodermic syringe

1ml Vaccination or Tuberculin hypodermic syringe are roduced for purpose of injection of vaccine medication.

- Fixed needle.
- Detachable needles.

## feature

- Syringes come with fixed needles to avoid hands and fingers remain away from the needle during injection.
- Bold, easy to read gradations.
- Enhances accurate dose preparation and verification.
- Permanently attached needle injections.
- Ease in facilitating low-angle injections.
- Less disposal space Potential reduction and prevention of disposal related injuries.

## Product Chart

- 1ml RAMY<sup>®</sup> Tuberculin syringe. Slip Tip nozzle with detachable needle.
- 1ml RAMY<sup>®</sup> Tuberculin syringe. Slip Tip nozzle with detachable needle.

Standard needle sizes: 25Gx5/8", 26Gx5/8", 27Gx1/2"

- 1ml RAMY<sup>®</sup> Tuberculin syringe. with fixed needle.
- 1ml RAMY<sup>®</sup> Tuberculin syringe. with fixed needle.

Standard cannaule fixed: 25Gx5/8", 26Gx5/8"

# RAMY<sup>®</sup>

Hypodermic needle

ALSHIFA offers a wide range of hypodermic needles with the focus on patient comfort. The hubs are color coded for gauge identification. RAMY<sup>®</sup> blister packaging allows for ease in dispensing the needle.

## feature

- Extra needle sharpness - minimizes patient discomfort.
- Color coded hubs - ease of gauge identification.
- Translucency hubs - ease of flashback confirmation.
- Special needle lubrication - improving injection comfort.

# RAMY<sup>®</sup>

1 ml & 0.5 ml Insulin syringe  
U-100 with fixed cannulae

RAMY<sup>®</sup> 1ml \ 0.5 ml Insulin syringe U-100 with fixed cannulae is available in both blister packaging and 10pcs Pouch Pack option. For healthcare institutions that administer and insulin patients use injections on regular basis, the packaging that comprises of 10pcs wrapped sterile syringes can add up to a great deal of time saved over the long term.

## feature

- **Integral safety engineered design**

Hands and fingers remain away from the needle during injection.

- **Bold, easy to read gradations**

Enhances accurate dose preparation and verification.

- **Permanently attached needle**

Minimize medication waste.

- **Less disposal space**

Potential reduction and prevention of disposal related injuries.

# alshifa

Safety needles

ALSHIFA safety needle is a needle-based safety device that helps you easily convert from non-safety to safety, protecting healthcare workers from exposed to needle stick injuries.

## feature

- Intuitive, single hand safety activation - Minimal training and in-service needs.
- Safety sheath - Secure the safe covering of used needle, prevent accidental.
- No extra dead space - Minimizes the medication waste.
- Audible and tactile "click" - Easier confirmation of safety activation.

# alshifa

Safety blood collection , tube holder set

## feature

- The ALSHIFA safety blood collection tube holder set features a blood collection tube holder and a vacuum activation tube.
- The safety mechanism is an integral part of the device.
- The activation virtually eliminates exposure to both ends of the contaminated needle, reducing the risk of needle stick injury.
- The ALSHIFA blood collection tube holder is compatible with standard, multiple-samples blood collection needles.
- The ALSHIFA safety blood collection tube holder set allows users to keep both hands behind the needle when activating the retraction of the needle.
- The single use safety blood collection tube holder set complies with osha regulations to help eliminate cross contamination.

# alshifa

Oral feeding syringes

ALSHIFA offers a broad size of oral dispensing syringes including both clear and amber syringes.

## feature

- Special tip design - for wrong-route administration prevention.
- Clear dose scale - for accurate volume confirmation.
- Amber barrel - design for protect light-sensitive drugs.

Product Description	PCs /Box
1ml Oral Syringe with Tip Cap	100/Inner Box; 400/Case
3ml Oral Syringe with Tip Cap	100/Inner Box; 400/Case
5ml Oral Syringe with Tip Cap	100/Inner Box; 400/Case
10ml Oral Syringe with Tip Cap	100/Inner Box; 400/Case

## Blunt fill needles & blunt fill needles with 5 micron filter

ALSHIFA blunt fill needle with filter is used for draw-up of medication, re-constitution of medication and accessing IV Bags .

ALSHIFA blunt fill needle with filter features a 5 micron filter membrane that is designed to prevent larger particles being drawn into the syringe when preparing medications from ampules.

Product Description	PCs /Box
18G x 1 1/2"	100/ Box; 1000/Case
18G x 1 1/2" with 5 micron filter	100/ Box; 1000/Case
18G x 50mm	100/ Box; 1000/Case
18G x 50mm with 5 micron filter	100/ Box; 1000/Case

## feature

- 45° bevel for ease in draw-up of medication from vial.
- 18G for ease in draw-up of medications.
- Conventional standard hub to fit standard luer lock syringes.
- 5 micron filter - Effective filtration of contaminant particles.
- Color coded for identification.
- Lower cost than sharps engineered devices.

## National and international standards

1. Saudi arabian standards organization SSA 679/1992 - Sterile hypodermic syringes use and their methods of testing (equivalent to ISO 1993)
2. Saudi arabian standards organization SSA 68011992 - Sterile hypodermic needles for syringe use and their methods of testing (equivalent ISO 1996 )
3. Saudi arabian standards organization SSA 68311992 - Conical fittings with a 6% (Luer) Taper for syringes, needles & certain other medical equipment - Part 1 General requirements and methods of testing (equivalent to ISO 594/1-1986)
4. International organization for standardization: ISO 78861-1 : 1993 Sterile hypodermic syringes, Use and their methods Of testing. ISO 7846/1993
5. International organization for standardization: ISO 7864/1993 - Sterile hypodermic needle for syringe use and their method Of testing. ISO 594/2, ISO 594/1
6. International organization for Standardization: ISO 594/1 & 594/2 - Conical fittings With A 6% (Luer) Taper for syringes, Needles and certain other medical equipment - Part 1: General requirements & Part 2: Lock fittings.
7. Sterilization of health - care products - Ethylene oxide - Requirements for the development, validation and routine control of a sterilization process for medical devices ISO 11135 part1 & 2.
8. Sterilization of health care products - Radiation - Part 1: Requirements for development, validation and routine control of a sterilization process for medical devices ISO 11137 part .
